

ALGEBRA **BOOT CAMP**

DAY 5 : DISTRIBUTIVE PROPERTY

1. Complete the chart below:

Equation	Tile Model	Written Description	Mathematical Procedure
$2(x - 3) = 4$			
$4(3 - x) = 16$			
$-3(2 - 2x) = 18$			
$4(2x - 5) = 4$			

2. Verify each of the solutions using substitution on the back.
3. Create a word problem that matches the equation on the back.
