

# VOLUME

- Amount of space a 3D object occupies

- Amount of water needed to fill a 3D object

- # of **CUBIC UNITS** contained inside a 3-DIMENSIONAL REGION

$M^3 \text{ cm}^3$   
 3 DIMENSIONS  
 - Length  
 - Width  
 - Height

## To Find VOLUME...

$$8 + 8 + 8 = 24 \text{ units}^3$$

A FORMULA...

$$V = L \times W \times H$$

OR...

$$V = \text{AREA} \times \text{Height}$$

$$24 \text{ units}^2 \times 8 = 192 \text{ units}^3$$

## RECTANGULAR PRISM

$$\begin{aligned}
 V &= 4 \text{ cm} \times 5 \text{ cm} \times 9 \text{ cm} \\
 &= 20 \text{ cm}^2 \times 9 \text{ cm} \\
 &= \boxed{180 \text{ cm}^3}
 \end{aligned}$$

## TRIANGULAR PRISM

$$\begin{aligned}
 V &= \text{AREA} \times \text{Height} \\
 &= \left(\frac{BH}{2}\right) \times 4 \text{ cm} \\
 &= \left(\frac{8 \times 4}{2}\right) \times 5 \text{ cm} \\
 &= 20 \text{ cm}^2 \times 5 \text{ cm} \\
 &= \boxed{100 \text{ cm}^3}
 \end{aligned}$$

## CYLINDER

$$\begin{aligned}
 V &= \pi R^2 \times H \\
 &= \pi (4.1)^2 \times 11 \\
 &= \pi (16.81) \times 11 = \underbrace{52.8101 \text{ cm}^2}_{\substack{\text{Area of the Bottom/} \\ \text{Top}}} \times 11 \text{ cm} = \boxed{580.9 \text{ cm}^3}
 \end{aligned}$$
