

Patient File

You are a medical school professor who is preparing a patient file for a medical student exam. You must give the actor you've hired enough information to play the role of a sick patient. However, because this is a medical exam, you may not share with the actor what illness they are affected with. You must provide all relevant information to the actor to support them and the medical student in the exam.

You are required to fill out the following document and compile a concise description of your patient's details. Compile your final information in the table on the final page.

Illness: [WRITE YOUR ILLNESS/CONDITION/DISEASE HERE]

Research: 2 **minimum** pages of research with *direct* links posted (3 sources **minimum**)

Patient's Name:	
Patient's Age:	
Patient's Gender:	
Patient's Ethnicity:	
Patient's Occupation:	
Habits and Lifestyle (smoker, diet, exercise):	Fits within the factors that make it likely to have the disease [1-2 paragraphs of information]
Describe the symptoms of the patient that affect **each organ system**.	**Respiratory System:** [1-2 sentences if applicable] **Circulatory System:** [1-2 sentences if applicable] **Digestive System:** [1-2 sentences if applicable] **Excretory System:** [1-2 sentences if applicable] **Nervous System:** [1-2 sentences if applicable]
